Awareness session on Brain Cancer Awareness Event

INTRODUCTION

"Accept what is, let go of what was, and have faith in what will be." June is globally recognised as brain cancer month, dedicated to increasing understanding of Brain cancer, promoting early detection, and supporting those affected by the disease. This month aims to increase knowledge about "Equity in Care and Research: Leaving No One Behind." and understanding risk factors to help reduce the impact of brain cancer worldwide. Brain cancer is the result of cancerous cell growth in your brain. The cancer cells form tumors that can be slow-growing or fast-growing depending on the type of tumor. Brain Cancer day is celebrated on June 8th every year. This is different than other cancers which start in another part of your body and spread to your brain. When that happens, it is called secondary or metastasized brain cancer. The global ASR of incidence of brain cancer was 4.8 per 100,000 in males vs 3.6 per 100,000 in females. Several factors can increase the risk of developing brain cancer. These include age, exposure to ionizing radiation, family history, and certain medical conditions. The exact cause of most primary brain tumors is unknown, but several factors are thought to increase the risk, including age, genetic predisposition, radiation exposure, and certain environmental factors. In recognition of World Brain Cancer Day, the department of Adult Health Nursing along with 4th semester BSc nursing students took the initiative to organise various events on brain cancer awareness.

Event: Brain Cancer Awareness Event Date: World
Brain Cancer Day, June 8, 2025 Location: Sree Gokulam Medical
College And Research Foundation, Super specialty Department
Organized by: 4th
Sem BSc Nursing Students, Sree Gokulam Nursing College,

performance the students aimed to educate the public about the risk, symptoms, and prevention of brain tumor. The event was conducted on the super speciality OP and it was a huge success, attracting a large crowd and sparking meaningful conversations about Brain Cancer. The event was guided by Mrs. Revathy, Assistant professor, and Mrs. Athira, Assistant professor, from the department of medical surgical Department of Sree Gokulam Nursing college. The students' efforts were commendable. Mr. Devin, Mr. Devinath, Mr. Jinto, Ms. Jomi, Ms. Diya, Ms. Devika were characterized as nurse, doctor, co-workers, patient, wife etc and the event served as a shining example of community empowerment through education and awareness.

Following the skit,

The students conduct an informative education session on Brain Cancer with local language. The session began with an introduction by Ms. Gopika Rengish who provided the audience with an overview of the forthcoming session which grew interest among the audience. Ms. Devapriya Siju then explained the Definition, Etiology, Risk factors. Then types discussed by Ms. Malavika. Clinical manifestations and diagnostic evaluation by Ms. Farhana. Medical management was explained by Ms. Gouri and The surgical management by Ms. Karthika and Lately Lekshmi T.S explained Stages, Tnm Classification.

CONCLUSION

Towards the end of the session Ms. Devika, summarised the key points stressing the importance of Brain Cancer early detection and treatment and its management. The students used vibrant visual aids and easy to understandable language to communicate critical information making the session accessible to the diverse audiences present at the Super Speciality Department of Sree Gokulam Medical College And Research Foundation.
