

SREE GOKULAM NURSING COLLEGE, VENJARAMOODU

DEPARTMENT OF COMMUNITY HEALTH NURSING

Entomology Visit Report

As a part of Community Health Nursing posting for 5th semester B.Sc. Nursing students, visited entomology department of Sree Gokulam Medical College and Research Foundation.

Objective:

To observe and understand the study of insects and their role in various ecosystems.

Key Observations:

1. **Insect Identification:** Observation of insect identification techniques, including morphology and taxonomy.
2. **Insect Behaviour:** Study of insect behaviour, including mating habits, foraging, and social interactions.
3. **Ecological Role:** Understanding of the ecological role of insects, including pollination, decomposition, and food sources.
4. **Pest Management:** Observation of pest management strategies, including integrated pest management (IPM) techniques.

Insects Observed:

1. **Beneficial Insects:** Observation of beneficial insects, such as bees, butterflies, and ladybugs.
2. **Pest Insects:** Study of pest insects, including mosquitoes, cockroaches, and agricultural pests.

Best Practices:

1. **Conservation:** Importance of conserving beneficial insects and their habitats.
2. **Sustainable Practices:** Use of sustainable practices in agriculture and pest management.

3. **Research:** Encouraging research and innovation in entomology.

Conclusion:

The entomology visit provided valuable insights into the fascinating world of insects and their importance in ecosystems. The observation of insect behaviour, ecology, and management strategies was informative and engaging.

Report

As a part of Community Health Nursing posting for 5th Semester B.Sc. Nursing Students on 17/12/25, 28/11/25 gone for Entomology visit in Sree Gokulam Medical College and Research Foundation. Mrs. Preethi G Vijayan, Mrs. Nivya R S, Mrs. Gayathri Chandran R L, took part in this observation visit. From 9.00am to 12.00pm the session includes explanation of transmission of diseases and prevention. After that microbiology lab is provided for the students to know the egg and larvae in the cycle stages. Through the visit students got adequate knowledge regarding purposes of the entomology study in Community Health Nursing.
