

## SREE GOKULAM NURSING COLLEGE, VENJARAMOODU DEPARTMENT OF COMMUNITY HEALTH NURSING

### Milma plant Observation Visit Report

As a part of Community Health Nursing posting for 5<sup>th</sup> semester B.Sc. Nursing students we visited pasteurization plant in MILMA. In that area students got adequate information about pasteurization plant and processing unit of milk.

#### Objective:

To observe and understand the operations, processes, and management practices at Milma.

#### Key Highlights

1. Dairy Operations: Observation of dairy farming practices, including cattle care, milking, and milk handling.
2. Milk Processing: Observation of milk processing, including pasteurization, packaging, and quality control.
3. Product Range: Observation of various dairy products manufactured, such as milk, curd, ghee, and cheese.
4. Quality Control: Observation of quality control measures, including testing and inspection of milk and dairy products.
5. Supply Chain Management: Observation of supply chain management practices, including procurement, storage, and distribution.

#### Best Practices in MILMA

1. **Hygiene and Sanitation:** Strict adherence to hygiene and sanitation practices throughout the dairy operations and processing.
2. **Quality Assurance:** Robust quality assurance measures to ensure the quality and safety of dairy products.
3. **Efficient Supply Chain:** Efficient supply chain management practices to ensure timely delivery of products.
